AIR Shelter

Inflatable Shelters

The AIR shelter is very quick to pitch, inflation is achieved in no time at all thanks to the supplied hand pump, simply peg the four corners and inflate from the two inflation points on the outside of the shelter. On the underside of the shelter, tensioning straps ensure a square shape is maintained whilst durable guylines and supplied pegs keep the shelter stable. Four side panels are included as standard for privacy and extra weather protection.

Pegs

To make choosing the right peg even easier, we use colour coding to signify that peg's ideal ground usage. This will allow the consumer to easily identify the pegs they require for different ground surfaces. Blue is for hard and rockier ground, red is for soft & muddier ground conditions, yellow is for sandy and loose ground and grey is for specialist needs.
